INTRODUCTION

This guide contains instructions on how to send an SMS via Email using any email client. There are two methods available, send a single SMS or send bulk/multiple SMS's from one email account.

Email to SMS Prerequisite

1. An email client
2. For security reasons, only one email address can be authorised to send Email to SMS requests for an SMS account. To configure this please follow the procedure provided in the "How to Register" section.

HOW TO REGISTER

To register a new email address (or change the registered email address) please send an email to register@mymobileapi.com as specified below.

The email must be addressed to register@mymobileapi.com, contain the subject line (as shown below) and must be sent from the email address you would like to register.

A response reflecting the success of the registration process will be sent once the process is completed.

Email Field	Description
From	Your email address
To	The To address must be register@mymobileapi.com .
Subject	Options: All options must be separated by braces. <ul style="list-style-type: none">• [un=myusername] – Your portal username• [pw=mypassword] – Your portal password Example of a correctly formatted email subject line: [un=xxx][pw=123]
Body	Not Used
CC	Not Used

Example of registration

The subject line contains the required information, un and pw, while the email is addressed to register@mymobileapi.com, and sent from the email address you would like to use.

Message (Plain Text)

File Message Insert Options Format Text Review Adobe PDF

Send

From: youraddress@yourdomain.com

To: register@mymobileapi.com

CC:

Subject: [un=xxx][pw=123]

SINGLE SMS - HOW TO SEND

The following settings are available.

All emails must be addressed to `<mobilephoneNumber>@mymobileapi.com` and must contain the subject line, have a from email address and contain a message

Email Field	Description
From	Your email address
To	The To address must start with a mobile number and contain the domain in the address. E.g. 0721234567@mymobileapi.com. Only one email address will be accepted.
Subject	The subject must contain your account password.
Body	The message you wish to send to the mobile phone. This can be in plain text or HTML. All html tags will be stripped from the message and only the text will be sent.
CC	Not Used
BCC	Not Used

Single SMS - Example of Sending

The screenshot shows a web-based email client window titled "Message (Plain Text)". The interface includes a menu bar with "File", "Message", "Insert", "Options", "Format Text", "Review", and "Adobe PDF". On the left, there is a "Send" button with a paper plane icon. The main form contains fields for "From" (youraddress@yourdomain.com), "To" (0721231231@mymobileapi.com), "CC" (empty), and "Subject" (mypassword). Below these fields is a large text area containing the message "This is my message.".

BULK SMS - HOW TO SEND

The following settings are available. Those in **red** are required

All emails must be addressed to bulk@mymobileapi.com and must contain the subject line, have a from email address and contain a message.

Email Field	Description
From	Your email address
To	The To address must be bulk@mymobileapi.com when sending to multiple mobile phone numbers from one email only one email address will be accepted.
Subject	The subject must contain your account password.
Body	<p>Each line item in the email body must consist of the following information:</p> <ul style="list-style-type: none">• Phonenumber• Message• CustomerId (optional) <p>And is separated by the tilde “~” (above the 1 or left of the one key on the keyboard)</p> <p>Example of layout: 0831234567~ test message 1~customerid(unique ref code) 0831234567~ test message 2~customerid(unique ref code) 0831234567~ test message 3~customerid(unique ref code)</p>
CC	Not Used
BCC	Not Used

Bulk SMS - Example of Sending

Message (Plain Text)

File Message Insert Options Format Text Review Adobe PDF

Send

From: youraddress@yourdomain.com

To: bulk@mymobileapi.com

CC:

Subject: mypassword

0831234567~ test message 1~customerid(unique ref code)
0831234567~ test message 2~customerid(unique ref code)
0831234567~ test message 3~customerid(unique ref code)
